## **MODULE 2**

### **NATURAL ENVIRONMENT, FIELD STUDIES AND MONITORING**

#### **SUGGESTED PARTICIPANTS**

Lands and Resources Officers (or similar capacity) and individuals interested in participating in field studies and monitoring

#### **TOPICS COVERED**

- Regulatory Requirements
- Environmental Protection
- Traditional Ecological Knowledge
- Field Studies and Monitoring Techniques

#### **COURSE OBJECTIVE**

This module will provide a technical overview of the natural environmental components being considered for the Project, including hands-on practical field exercises. Upon completion of this module, participants will be trained to assist in the Project as Environmental Monitors or Field Technicians through procurement opportunities.

#### **DURATION AND SCHEDULE**

Five day classroom session and field exercises anticipated to start in Summer 2021
